

General Notes

1. When the widget is closed, the results should be cleared.
2. When the widget is processing the results on the server, the app should prevent the user from taking further action till the request is done. There should be a visual indicator of this such as a loader.

Drive Time Analysis Tool

Step 1

Select Drive Times for Analysis

Step 2

Once your drive times are defined above, then you click on the map to begin your analysis.

Clear Results

Numeric Spinners representing the time in drive time in minutes should not be able to increment above "15" minutes.

Clear results should only be visible if there are currently results to be cleared.
